The Dealings Were Irregular, But Not Unsatisfactory.

CALL LOAN RATES SUBSIDE.

The Estimate of the Cash Movement for the Week Promises a Loss of More Then Six Millions of Money.

(By Associated Press.)

NEW YORK, Dec. 13.—Stocks correct quite a notable recovery in to-usy's market. The market was very irregular during the early portion of the day and castinctly weak in spots. This was due to the residue of uncastiness coming over from yesterday's events and the tear that money stringency wound develop during the gard, incident to the earlying over of joans until Monday, Borrowers on call paid as high as 8½ per cent. early in the day, but they had no difficulty in obtaining accommosations at the prevailing rates. There was no intriher celling of loans by the banks or foreing of lequidation, in consequence, as was the cuse yesterday. The call joan rate yielded 38 the larger demands were satisfied, and fell below 6 per cent, at the close, Perceiving the course things were taking, the bars began to buy to cover their short contracts, which had been considerably extended in yesterday's decline.

There was some buying also by inside interests in the various stocks, especially during the morning, for the purpose of support. Under these influences prices began to recover, and toucled the high level of the day during the afternoon. This level was not only maintained but was stendy and dull and a fraction below the top level. Yesterday's anxiety over the rumors circulated of the embarrassment of a large international mercantile house was reineved by assurances that the trouble was tided over. This was a factor in the rubber stocks, and rubber lost 15g points.

The preliminary estimate of the cash movement for the week promises a loss of the cash movement for the week promises a loss of the cash movement for the week promises (By Associated Press.)

movement for the week promises a loss of upward of \$6,000,000 for the banks, but the casier tone helpful to a more helpful sentiment for the future. The week's lignidation, both in the stock grain and cotton market, may have effected some reduction of the loan account of the banks. The week's movement of cash shows no gain of any significance from the interior on the express movement, while the transfers through to the sub-Treasury have amounted to \$2,700,000. Additional supplies of money next week, as indicated, and relief from the liquifaction are clearly the only factors in sight to warrant the easier tone of the money market. In the late strength of the market gains of \$100 points were made among the local tractions, trunk lines, coalers, both hard and soft; Southwestern and a number of specialties. General Electric gained 7 points. Copper fluctuated feverishly on the announcement of the open cut in the price of raw copper. The stock rose to 65% at one time, and was near that point several times. The low price was 66%, and it closed only ½ higher at a net decline of 15%.

Bonds were irregular and only moderately active. Total sales, par value, \$2,035,000. United States bonds all unchanged on the last call.

The total sales of stocks to-day were \$25,300 shares.

COTTON MARKETS.

NEW YORK, Dec. 13.—The cotton market opened easy with prices 100 points lower, and was weak for a time under liquication and pressure from room bears, who took every advantage of tame speculation and the continued absence of Liverpool hows. Liverpool's closing cables of yesterday gave an advance of 464½ points. The wire trouble continued to-day, and the local trade was without information up to the closing. Heavy port receipts tended to check any disposition to buy for the moment. January cased off to 8.12 and May to 8.16. Before midday, however, there was a change for the better in the whole ruling of the market on official estimates for light rethe better in the whole ruling of the market on official estimates for light receipts to-morrow, bullish spot market news and a much smaller "in sight" movement than predicted. The Continent and the South bought here from time to time, and some cotton was picked up by New England spinners. During the atterneon snorts had a trying time of it in getting back cotton cold in the morning, and prices steadily improved to the top notch for the day. Wall Street supported March and May, while commission houses bought moderately throughout the list. The weakness in the stock market and The weakness in the stock market and the irregular movement of money had a disturbing effect indirectly upon cotton. The close was quiet with prices net 1

IN STOCK MARKET

Money Was Easier During the Late

AND PRICES WENT UP.

Close Was Firm-Anxiety as to the Bank State-

The market for American stocks in London opened firm yesterday with Union Pacific as the feature, but there was lit-tle disposition in the New York market to respond, although the opening here was higher than closing prices the day before. There was very little in the sit-uation to give the bulls encouragement, and prices again began to sag. Money ruled during the greater part of the sesruled during the greater part of the session at 8 per cent, and it was given out that the known movements of money from last Friday up to the close of business on Thursday indicated a loss by the banks of \$6,246,278. It is apparent from this that unless the banks have materially decreased their loans during the week, the surplus fund will be practically wiped out.

A RALLY. A RALLY.

In the afternoon trading it was given out that this had been done, and that the bank statement would be more favorable than it had been expected. The money rate dropped from 8 to 6 per cent., and, later, to 5 per cent. Colincident with this, there was a substantial rally in many stocks, notably in St. Paul and Southern preferred. Southern preferred. and Southern preferred. Southern pre-ferred has behaved admirably during these hard times in the stock market, and it is now freely predicted that that stock these hard times in the stock market, and it is now freely predicted that that stock will be put upon a 5 per cent. basis next spring. The rally was doubtless due to covering by shorts, and was not fully maintained, although the closing was firm at a fraction under the best prices of the day. As one broker expressed it, the market was sold down to a standstill, and with cheaper money it was natural that the shorts should run to cover.

SOME OPINIONS.

A Richmond broker, who is now in New York, telegraphed this message to his house yesterday: "I don't think the money situation quite clear yet. But any one who buys the good stocks on a scale down on weak spots will see a good profit by the 10th of January."

A New York broker, whose opinion is very highly regarded here, sent the following to a Richmond house: "You can buy Louisville and Nashville and Southern Railway preferred on scale without

bu, Louisville and Nashville and Southern Railway preferred on scale without fear. There are fifteen points advance before five points decline in each of them, barring some unforeseen accident."

A Richmond man remarked yesterday that "Christmas cheer in many a household in this city would be more or less marred by the fact that the Christmas turkey is stuffed with L. and N." It is to be hoped that all who are thus afficted will take comfort in the prophecy of this New York broker.

ed will take comfort in the prophecy of this New York broker.

Chesapeake and Ohio earnings for the fourth week in December showed a de-crease of \$10,859. Norfolk and Western was nearly a point higher yesterday. It was given out that this company had or-dered 1,250 cars and will order 1,000 more to accommodate its heavy business. Earnings of St. Louis and San Francisco for the first week in December increased \$48,556. \$48,956.
Application has been received by the

committee on stock list of the New York
Stock Exchange to list \$15,984,400 additional common stock of the Virginia-Carolina Chemical Company.

AMERICAN LOCOMOTIVE.

The New York Sun prints the follow-

The New York Sun prints the following:

"President Callaway, of American Locomotive, who has just returned from Richmond, Va., where he inspected the plant of the company, says: The prospects, as well as the present state, is very gratifying. Already we have orders in hand to keep us busy all of next year. The condition of locomotive business, as reflecting the railroad business of the country, indicates that the present high state of prosperity is to continue next year, at least."

The Richmond broker, who had the cold shivers because Friday feil on the 13th day of the month, is feeling better to-day. He has had plenty of comparw. It is believed that if the bank statement to-day is more favorable than has been predicted, the market will have a substantial raily.

stantial rally.

The Produce Market,

An active market in poultry is expected during the latter part of next week and the first one or two days of the week fellowing. Especially on Monday and Tuesday before Christmas will turkeys by in demand. Merchants are advising shippers to have their goods of this kind here certainly not later than Tuesday monning. Dressed and drawn turkews said yesterday at 10½ to 11½ cents per pound; undrawn, 9 to 10 cents. Live turkeys are worth 8 cents per jound. Chickens are still selling for 11 to 12 cents per pound. Ducks are worth 12 to 13 cents; geese, 8 to 9 cents, and here, 8 to 9 cents.

Receipts in eggs are about equal to the demand just now, and the market in this line is inclined to be somewhat weaker. Eggs sold yesterday at 23 to 24 cents per dozen. An active market in poultry is expected

Jobbing Distribution Quiet as Usua! at This Season-Grain and Cotton.

(By Associated Press.) NEW YORK, Dec. 13.—Bradstreet's tomorrow will say:

Holiday trade is in full swing in all markets, while jobbing distribution naturally is quieting down preparatory to stock taking. Nearly all advances touching these latter branches of business are oncouraging, and the year's results, so far as ascertained, are on the whole very favorable. Among the industries, iron and steel are easily first in strength of demand and prices, and the word buoyant about accurately describes the situation as regards the feeling in the trade generally. Probably never before was so much business booked in advance as there is at present for pig-iron, rails, and finished products. Southern iron deliveries in November were the heaviest on record, and higher prices for bitiminous coal are predicted.

The crest of the recent rise in cereals was reached Saturday last for coarse grains, and on Monday, December 9th, for wheat and provisions. The propor-tions of the recent rise induced enormous realizing, which for a time was offset by heavy new buying, but ultimately the size of the grain movement and increases in visible supply added to the breaking of the drought in the Southwest and of the drought in the Southwest and the tightness of money left the bears masters of the field. The steady rise in wheat and corn prices shown since the early part of November had resulted
